

Product Specifications

The new MacBook, MacBook Pro, and MacBook Air each have a Mini Display Port that allows you to connect an external display or projector using an adapter. You can use an external display as your main workspace or to extend your desktop, or you can work in mirrored mode with a projector so you can view what your audience sees. Connect any standard analog monitor, projector, or LCD that uses a VGA connector with the Mini DisplayPort to VGA Adapter. Mini DisplayPort 1.1a compliant receiver offering 5.4 Gbps bandwidth over 2 lanes. Integrated triple 10-bit, 162 MHz video DAC for analog VGA signal output. Supports up to 1080p, 1920 x 1200 reduced blanking video resolution. EDID pass-through from PC source to display.
