

## Product Specifications

Bring HDMI capabilities to your smart phone or other mobile device with this Micro HDMI (type D connector) cable. Even with its small form factor, this cable supports the full HDMI specifications including: high speed 10.2 Gbps data rate, Ethernet over HDMI, 4k x 2k support, audio return channel, 3D and deep color support. This is the newest and best digital video connection on the market. HDMI is the only cable that can transfer compressed high-definition video and multi channel digital audio in resolutions higher than 1440p. The HDMI connector is small, which makes it ideal for installers and in-wall use. HDMI cables can be used with your HDTV's, DVD players, game consoles, cable and satellite set top boxes and DVR's. This cable conforms to the latest HDMI high speed with Ethernet specification.
