

Product Specifications

This multi-function tool cuts, strips and crimps for an easy on-the-job, one-tool application. Steel frame provides added durability. Crimps primary modular plug strain relief only. Agiler economical medium service modular crimp tools are the right choice where the expense of a professional grade tool is not wanted. Featuring magnesium steel, these tools provide a quality crimp for RJ style plugs. Each tool is made with an all steel frame to insure a long service life. A built in cable cutter allows for faster cable prep with just one tool. Improve your modular plug terminations by getting a new crimp tool today.
