

Product Specifications

Use this Power Strip to get the power you need. If your device is too far away or the socket inconveniently placed, this is exactly what you need! 6 feet of male-female power cable is more than enough cable to reach to the machine you want to connect and to the power socket. This is especially good for large entertainment setups, where ordinary length cables will not be able to reach the power socket or might be too short for reaching the power strip.

Key Features:

- 6 outlet surge protector
- Power switch
- 15AMP cord-125V
- Easy to use
